

TÍA ISA WANTS A CAR

Meg Medina

Illustrated by **Claudio Muñoz**

Ideas for the K - 2 classroom

Financial literacy and art

Make a classroom store to study saving, budgeting, and earning money. Students can create and decorate a bank to save for a special item of their choice. (Money socks are always fun!)

Creative writing and art

If you could buy a car, what color would it be? Where would you like to go in your car? Who would go with you? Encourage young writers to create their own car and make their own story! Materials: story paper; template of car in a variety of colors and shapes; black circles for wheels, glue sticks.

Learning about transportation and community

Students create their own license plate. Materials: sample of real license plate for your state as a model; peel-and-stick foam letters and numbers; white foam rectangles pre cut to size; printed strips with state name, month, year; slogan.

Practice a foreign language

How many Spanish words can you find in the book? How do you say “beach” in Spanish? Aunt? Uncle? Are there new words you’d like to know?
